WHO WE ARE AND WHY WE EXIST

Originally we were the Michigan 994 Users Group, but in February of 1982 we expanded our services nationwide. We are users, just like yourself, who used to be frustrated about product availability, lack of good software, and downright lonesome! We are not alone anymore and have found friends to share information with across the world. Our purpose is to serve our members in what ever capacity that we can. We believe in the TI 99/4A computer and try our best to support its users on all levels of personal need.

Maybe you are not interested in an informative and helpful newsletter, sizeable product discounts, high quality third party software, honest product reviews, programming contests with nifty prizes, a user software directory, or programming assistance. If you aren't, then throw this away! If you are, then perhaps you should read on!

We publish eight newsletters a year and each one contains helpful programming tips, product reviews and announcements, third party software reviews, submissions from our members on a variety of topics, and applications for your computer and related peripherals. We try to keep you current and informed as to what is going on with your computer, and try to be objective about the product and program reviews. It is easy reading, sometimes a bit humerous, and always helpful.

We allow our members, and only our members, to purchase all TI hardware and software at considerable discounts. They average out to 25% below the suggested retail price! We stock many of the more popular items and will special order anything that you want. We also handle several software lines and will discount their products when possible.

We are available Monday through Friday from 10:30 A.M. until 7:30 P.M. We reserve the hours from 2:00 until 4:30 for programming assistance! All letters will be answered, as we try to meet each individual members particular needs. If we do not have an answer for you immediately, then we will find one if it exists in reality.

We offer programming contests several times a year. Our last one saw us give the winner a new Peripheral Expansion Cabinet. Topics are not limited, you may use any language, and can write to either diskette or cassette. We also hold drawings from time to time and simply give away a neat prize to the person whose name comes up. Such as the free Mini Memory we gave away and the Adventure games. You don't have to be a programmer to be a winner.

We also have a software directory that contains three varities of programs for our members to partake of. First, we will send each member ten free programs in hard copy per year. They may select the ones they want. Second, members may purchase programs from us at a cost of $2 apiece in hard copy, minimum of 4 at a time. The authors of these programs will be paid a royalty by us! Finally, we offer high grade programs to our members that range in cost from $7.50 to $16.50. They are available on cassette and

diskette. The directory clearly shows which program falls into what catagory.

We also offer high quality software from such developers as FUTURA and MAPLE LEAF MICRO WARE. We stock their programs and will sell them at a reduced price when possible. For instance, last September we offered all of the FUTURA games at $16.95 as opposed to their normal retail price of $19.95. We will only handle "high" quality software, as we do not want our members wasting their investment on undesirable products!

We welcome your comments and your questions. We do not believe in dumb questions, as what you want to know is always important! We exist to serve our fellow users and will do our utmost to help them with their problems and desires. We do not promise perfection or infallibility, but we do promise to always do our best!

We will always give you an objective and accurate answer, as we do not wish to see you intentionally misled. Our objective is not to exploit you, but to exploit the mutual benefits of cooperation and information sharing. You will get a honest answer from us, regardless of how unpleasant it may be.

Our yearly membership fee is twenty dollars. If you want to become a part of us, just fill out the information below and mail it back to us. Please remember to enclose your check or money order with the information! We will forward to you the program directory; as you have already received the member price list and sample newsletter along with this information package. We hope to see your name on our mailing list soon, we believe in you and hope that you will learn to believe in us. Thanks for your interest!

MEMBERSHIP INFORMATION

NAME..... AGE.....
ADDRESS.....
CITY..... STATE..... ZIP CODE.....
AREA CODE..... HOME PHONE.....BUSINESS PHONE
.....

1.. How long have you owned your TI 99/4A?.....
2. What do you use the computer for? Personal use ( ), Business ( ), Education ( ), or Recreation ( )
